

Feature Car of the Month: August, 2011

This month's feature car belongs to Jason & Heather Walton. They joined SCMC in September 2010. You can usually see Jason at the 100 FT Drags at Waterford Speedway. Jason's GT pulls 506 horse to the wheels with the help of the long list of modifications his GT has received. The 4.6 liter engine is fitted with a Saleen Supercharger, BBK long tubes, BBK Hi-Flow X Pypes Violator mufflers, BBK twin 62 mm throttle body and Comp 127550 Stage 2 Blower cams. To make the GT stick to the road and handle well it sports GMS sub-frame connectors, BMR lower control arms, CHE upper control arms and a BMR adjustable panhard. Jason has done the work himself and has done a real fine job. This Stang sounds real mean when fired up. Great job!!
