

Feature Car of the Month: February, 2010

This month's feature car belongs to Joe & Pat Pajak. Joe & Pat have been members since September of 2009. This awesome looking '64 1/2 coupe is powered by a bored and stroked 351 Windsor fired by an MSD ignition system and breathes through K&N filters, Edlebrock 4bbl carb and intake and Hedman headers. Power is transferred by a C4 automatic transmission with overdrive back to a 355 posi rear. Gear selection is done through a Hurst shifter. For safe stopping stainless steel brake lines with front disc brakes do the job well.
