

Feature Car of the Month: May, 2011

This month's feature car belongs to Bill Nichols. Bill has been members since May 2010. This GT coupe is powered with a V8 backed by a 5 speed transmission that gets the Mustang where it needs to go. Some of the modifications include a C&L cold air intake, BBK twin 62 mm throttle bodies, MGW short shifter, I-forged wheels, Pypes exhaust, SSBC brakes, UPR hood pins, Comptrack GPS security system and much more. Bill's GT has an awesome sound and looks great. Check it out at the next event and ask Bill about this beautiful modern day muscle car.
