

Feature Car of the Month: September, 2011

This month's feature car belongs to Robert Bogue. Robert joined SCMC in June 2009. Robert's White California Special is powered by a 4.6 liter engine backed with a 5 speed transmission. For great handling he added rear traction bars to eliminate rear wheel hop and a stability control bar under front of engine. The 4.6 breaths better with the help of a G&L air induction, Magnaflow mufflers and more custom tuning that was performed by J&M Automotive located in Manchester, CT. Next time you see Robert at an event, stop and ask about his car. He can fill you in on much more concerning his prized GT/CS.
