

SCMC 2008 Fall Tour

This years fall tour took us first to Precision Auto High performance Auto Restorations in Eastford, CT. We were taken on a tour of there facilities by Dave Eichner and Jeff Leonard. They both, along with there staff, took the time to show us some of the works in progress. The project cars were in many stages of the restoration process, some were nearly complete and others were down to the frame. All of those interested in having any work done to there collector car could not go wrong with choosing Precision. A special thanks goes out to the Staff of Precision Auto for inviting us and answering any and all questions.
