

President's Corner

June, 2011

Hello gang;

Club members have signed up for the first ever SCMC Dyno Day that took place at Swift Motorsports in Norwich on May 15th. It was a perfect day to test with the air being cool. To make it more interesting we even had a 1971 Roadrunner test with us. It was truly a fun day for all. Guessing how much horsepower each car would have became the game of the day. Many times the guess was off by only ten hp. Most were surprised with their results and some say they are going to make modifications for increasing power. Thanks to Sean and the crew at Swift for a great day. I do hope that by now Sean has the use of his arms back as most of the 12 cars tested had no power steering which made for a long day for him I'm sure. Highest numbers for the day were Jason Walton with 506.3 to the wheels and lowest was Jeanette Santoro with her six cylinder making 66.4 the wheels. Look for the other results further in this newsletter.

The first cruise night of the season brought out around thirty cars, which was not bad considering that the weather was questionable for the day. Thanks to everyone who helped out through out the event to make it happen. All your efforts make things happen.

The town of Groton has once again asked us to participate in the July 4th Parade. To participate members have to be current on their dues and provide a copy of their current insurance card. You can email a copy of your card to me at lgboutinsr@comcast.net no later than June 24th. The dead line has been extended from the original June 10th.

Information on when and where to meet will be sent as soon as I get it. Next cruise is June 18th at Tri-Town 5-8 pm.

See you all there,
Lucien
