

# ***President's Corner***

## ***March, 2011***

Hello gang;

Well it's nice to see the snow going away fast and the temperature going up. It means that spring is finally coming. I have not had much time to work on the Mustang but the upcoming season sure is an incentive to get going. Valve seals still need to be done and tachometer work also. I am finding out that there is a lot of math involved in electronics and I wonder how my Dad used to know all that information when asked. I will however figure it out.

There is a new section in the newsletter for members to post their skills and knowledge for other members that are in need of some help. Please send your information to Patty so she can get it posted. If you need help on something send it in or if you want to let someone know of your special skills send that info in also. This will be a great way to keep everyone running and get to know each other better. In talking with many of you I know that we all have something to share.

Also if anyone has any idea for a small get together let me know so it can get into the newsletter. It can be anything from meeting for breakfast, coffee, lunch or just cruise to a local ice cream shop. It would be a great time to get together for cruising the Stang's and having fun.

As hard as it will be for many of us, let's try not to let the price of gas keep us from getting together. There are always ways to make things happen. Next meeting is March 19<sup>th</sup> in Norwich at 4:00 pm.

See you all there  
Lucien
