

President's Corner

May, 2011

Hello gang;

Well after the first date for Auto Zone got rained out, the rain date turned out cloudy and cool but did not stop between 25-30 Mustangs from enjoying the day. I sure was great to see all of you after the long winter we had. It is now time to start enjoying each others company and driving those Stang's we worked on so hard over the winter. On May 14th SCMC members are going to Swift Motor Sports in Norwich to do some dyno testing. This should prove interesting to see how much horsepower they actually have as compared to what we think we have. I do not know mine so it should be interesting to see how close I am to the factory 139 hp my Mustang is rated at. Remember that just adding on a set of headers does not automatically give you that extra horsepower the ad might tell you. There are many other changes to be made along with that to get the extra ponies. The only change my car has had over the years was dual exhaust that was not original to the car. My results will be interesting for sure. On May 21st our first cruise night for the season will begin at Tri-Town Foods in Uncasville. This event starts at 5:00 pm and runs until 8:00 pm. As always members are asked to arrive at 4:00 pm to help in setting up. If you want to help and do not know what job to do, please ask me. With out everyone's help things will not get done. You are a great group of people and someone has always stepped up so I am not worried. I believe SCMC members are the best of the best. We always get the job done! Last I want to say Happy Mothers Day to all the SCMC Moms. I hope you all have a great day.

See you all there:

Lucien
